

**Households Can Now Be Toxic Chemical-Free with the
lotus® Sanitizing System™ from Tersano**
*System Turns Ordinary Tap Water into Powerful Cleaner and Sanitizer
For Household Surfaces and Even Food*

ONTARIO, CANADA – Tersano, a company dedicated to changing the way we think about cleaning chemicals, today announced the launch of the innovative lotus® Sanitizing System™. The system, which infuses ordinary tap water with ozone to create a completely safe, natural cleaner and sanitizer, was named “Best Invention of 2006” by *Time Magazine*.

“There are a lot of ‘green’ and ‘natural’ products out there, but they still come with Material Safety Data Sheet (MSDS) information that tells you to wear rubber gloves or safety glasses as a precaution,” said Steve Hengsperger, President of Tersano. “With our product, there’s no MSDS sheet – it’s totally natural.”

Oxyshield® technology.

The System draws from technology widely used by progressive hospitals worldwide to clean and sanitize surgical instruments. The compact household unit developed by Tersano converts the oxygen found in ordinary tap water into a “super” natural oxidant (ozone) using its unique, patented Oxyshield® technology. Ozone is a safe and natural sanitizer that is harmless to healthy cells. The resulting ozone-infused water has been proven highly effective as an all-purpose sanitizer for surfaces and other items, a powerful cleaner that removes stains, mold, mildew and odors, and a medium that neutralizes 99.9% of bacteria and reduces pesticides on foods. The system comes with a base unit, an all-purpose sanitizing bowl, a spray bottle, booster cartridge and two microfiber cloths.

Fight against food scares.

In September of 2006 when E.coli bacteria found on spinach resulted in three deaths, Hensperger used the Lotus Sanitizing System to demonstrate how it can eliminate 99.9% of E.coli on spinach – and can also be widely used as a safe and effective way to decontaminate all kinds of foods: meats, poultry, seafood, fruits and vegetables. Washing produce in ozonated water also significantly reduces any pesticide residue found on the food, eliminating the need to buy expensive “organic” items.

Home chemicals and health.

“We have all but eliminated smoking in our society to safeguard our health. Yet, cancer rates are still rising, asthma rates are rising, and it’s time to face the fact that many of the household chemicals we use may not be good for us,” said Hensperger. In fact, the National Environment Trust studied information provided by New Jersey and Massachusetts, two states that track toxic chemicals. They found that on average, for every pound of neurotoxins, carcinogens, or reproductive or developmental toxins that facilities reported as released to the air, land, or water, they shipped 42 pounds of the same chemicals as or in products that could be used in or around the home.

Hensperger – and others who have tried it and now swear by it – sees his product as a safe alternative. “Our product is just one of many solutions, but I think it’s the beginning of the end to toxic household chemical cleaners,” said Hensperger. “I think our System is the best because it is the only one that uses plain tap water.” The ozonated water produced by the Lotus System quickly kills germs on all kinds of surfaces – cutting boards, kitchen counters, stovetops, utensils, sinks, toilets, garbage cans or diaper pails. It is also an excellent way to neutralize odors, and get rid of tough stains such as coffee, blood and pet accidents. The Tersano product line also includes Systems with toothbrush bowls for sanitizing toothbrushes and dentures, as well as one with a baby bottle bowl that can be used for baby bottles, pacifiers and small toys.

All the right approvals.

The technology used in the lotus Sanitizing System, which took four years to develop, is backed with full EPA, FDA and OSHA approval, and is also UL approved. The UL approval comes from the fact that essentially no ozone is released into the atmosphere by the process.

More information about the lotus Sanitizing System can be found at www.tersano.com

About Tersano, Inc.

A Canadian developer of cutting-edge household sanitizing systems, Tersano is an innovative company that is changing the way we think about cleaning chemicals, and in the process, creating an entirely new market category. Tersano's state-of-the-art technology improves quality of life and delivers peace of mind by providing consumers tools with which to reduce, if not eliminate, the need for toxic chemicals in their homes.
